

Saratoga Happy Color Alte Temperature – High Temperatures

Saratoga Happy Color Alte Temperature – High Temperatures is a high quality modified acrylic silicone resins based enamel, that allows to renew all surfaces that usually are subject to high temperatures. Resistant at peaks temperatures up to +350°C.

APPLICATION FIELDS

Saratoga Happy Color Alte Temperature – High Temperatures is used to varnish the walls of the heaters, boilers, ovens, chimneys, barbecues, fire screens, motorcycle silencers, etc. as long as they are kept out of direct contact with the flame.

APPLICATION

- All surfaces must be dust free, dry and degreased.
- Shake can for a long time, until hearing for a minute the sound of the marbles inside the can.
- Keeping the can 30 cm from the surface to treat, apply with slight coats. For a better result, cross horizontal coats with vertical ones. For an even better result, apply a second coat.
- With self-cleaning valve: when finished, clean the valve turning around the can and pressing till comes out only the gas from the can, without any varnish.

Clean varnish with Acetone and/or Nitro Diluent.

Specific data	
Appearance	Can containing under pressure liquid
Density at 20°C	0,75-0,8 g/ml
Brightness-Gloss degree	From 8 to 85 Gloss
Pressure at 20°C	4 ± 0,5 bar
Pressure at 50°C	8 ± 0,5 bar
Temperature resistance	Up to 350°C peaks
Coats needed:	1 in internals
	2-3 in externals
Skin formation time	10 minutes
Tack free	20 minutes
Fully dry	24 hours

For a better result, apply at room temperature (+15-25°C), also the can must be at the same temperature.

With childproof patented safety cap and colour reference token on cap.

Directive 2004/42/CE – VOC – Special Finishing Product. VOC limit value: 840 g/l. Real maximum content: 640 g/l.

STORAGE AND SHELF LIFE

In unopened original packaging, between +20 and +25°C. In any case, temperature must be over +5°C and keep out of sunlight.

CAUTIONS

Keep out of the reach of children.
