

Saratoga GreenHome Disodorante Igienizzante

Saratoga GreenHome Disodorante Igienizzante is formulated to eliminate the bad smells created due to the prolonged use of the air-conditioner, ensuring a perfect cleaning of the air-conditioner's piping.

Saratoga GreenHome Disodorante Igienizzante is ideal for aeration systems and domestic air-conditioning: thanks to the included flexible probe it is perfect for cars, campers, boats, industrial vehicles and buses.

APPLICATION

Shake before using.

On domestic units: open the small door which covers the filter and, after cleaning it, spray uniformly onto the filter itself.

For cars, campers, boats, industrial vehicles and buses:

- remove the pollen filter, if there is one;
- insert the included flexible probe through the filter base, for its entire extension or as far as the circuit allows;
- spray approximately two thirds of the content in the course of pulling back the flexible probe;
- spray uniformly onto the filter before taking it back;
- in order to preserve the unit in a good condition, it is advisable to perform a monthly cleaning of the internal duct: place the unit on the "internal recycle" setting;
- spray at the point where the air is sucked in (generally located in the central console area, underneath) for a few seconds, keeping the unit turned on to medium/low speed and windows opened.

STORAGE AND SHELF LIFE

In unopened original packaging, between +20 and +25°C.

CAUTIONS

Keep out of the reach of children.

Consult Material Safety Data Sheet for full list of hazards and the directions on the product label itself.
