

Saratoga Sbianca Fughe – Grout Whitener

Saratoga Sbianca Fughe – Grout Whitener is the special acrylic copolymers based product in water and titanium dioxide dispersion, that gives a high covering action and an excellent resistance to light and ageing.

It is anti-mould, washable and easy to apply.

Saratoga Sbianca Fughe – Grout Whitener contains Funghalt, a special fungicide that prevents the growth of bacteria, fungi and moulds, especially the *Aspergillus Niger*, responsible of the unpleasant black spots that grow in high humidity places.

APPLICATION FIELDS

Removes the unpleasant greyness that forms in the spaces between tiles as time goes by.

Can be quickly and easily applied, thanks to the foamed pad equipped with a special pressure valve, that allows an abundant and regular flow of product on the grouts, guaranteeing thus a perfect result.

APPLICATION AND INSTRUCTIONS

- The grouts to whiten must be completely cured, dry and clean. In case of spots of mould, it is recommended to begin treating with the specific product Saratoga Z10 Antimuffa – Anti-mould.
- Press the pad between one tile and another, letting slide the red valve in the middle of the grout.
- During application, use a slight and constant pressure on the body of the bottle.
- Use Sbianca Fughe – Grout Whitener with the pad oriented towards the bottom, proceeding until completion of all the grout, from bottom to top.
- Every 4 grouts completed, press the pad without moving it for 5/10 seconds, using no pressure on the body of the bottle.
- Let it dry for about half of an hour, remove the excess of product from the tiles with a wet cloth, without pausing on the grouts too much. Dry with a soft and dry cloth.
- After use, clean well the pad under running water, taking care to not press the valve during cleaning.
- The product presents a good mechanical resistance already after 12-14 hours from application.
- In any case, it reaches the maximum of resistance some days later.

Specificdata	
Aspect	White fluid
Stormer viscosity at 20°C (ASTM D 562)	85-90 K.U.
Specific weight at 20°C (ASTM D 1475)	1.1-1.2 g/ml
Tack free	1h
Completely dry	4-5 h

STORAGE AND SHELF LIFE

Between +20 and +25°C its shelf life is 24 months since manufacturing date.
Avoid frost.

CAUTIONS

Keep out of the reach of children.

Consult Material Safety Data Sheet for full list of hazards and the directions on the product label itself.
