

Saratoga Fernovus Spray

Saratoga Fernovus Spray is the anti-rust acrylic enamel spray that is sprayed directly onto rusty surfaces.

APPLICATION FIELDS

Saratoga Fernovus Spray is ideal on ferrous surfaces, it is applied directly to rust, without the need to sand or apply anti-rust products or converters. It is also used for painting wood, concrete, galvanized sheet metal (only if very oxidized and degreased), bare or painted metal. Easy and clean, it does not drip. It is used indoors and outdoors, has good resistance to sunlight, does not turn yellow, has good anti-corrosion power.

APPLICATION

- Clean the surfaces of oils, greases, non-adherent and crumbly rust (use an iron brush, a hard brush or abrasive paper), cover the parts not to be treated beforehand with adequate masking;
- Shake the can upside down vigorously for one minute;
- Spray at a distance of 25-30 cm, keeping the can upright, shaking the can occasionally;
- Apply with light and criss-cross strokes, first vertically and then horizontally;
- For excellent anti-rust protection it is recommended to apply at least 8-10 crosscoats at a distance of 10 minutes from one pass and the other.

Do not apply in the presence of excessive humidity or at temperatures below +15°C.
Paint removal with acetone and/or nitro thinner.

SPECIFIC DATA:		
Appearance and finish		Various
Dry to the touch	minutes	15-20
Deep dry*	hours	24-36
Application temperature	°C	+20°/+25°C

at +20°C and 60% relative humidity

STORAGE AND SHELF LIFE

In unopened original packaging, between +20°C and +25°C.

CAUTIONS

Keep out of reach of children.

Consult Material Safety Data Sheet for full list of hazards and the directions on the product label itself.
