

## Saratoga Fix Pads

Saratoga Fix Pads are double-sided tapes strips for strong and instant assembly with no need to use nails, screws and anchors. They are transparent amber coloured with white polyester weft, protected by removable blue film. 1 strip bears up to 4 kg under ideal conditions like gluing flat objects (thickness <10 mm) with smooth metal surfaces.

### APPLICATION FIELDS

Saratoga Fix Pads are especially suitable for indoor applications such as: plates, frames, handles, little hooks, ladle holders, etc.. They can be used on: metal, tiles, plastic (including PE, PP, PVC, ABS and PET), glass, crystal, wood, stone, and varnished surfaces in general; ideal for smooth surfaces and flat and thin objects.

### APPLICATION

- Surfaces must be clean, dry, degreased and dust free (do not apply on crumbly, flaky or non-cohesive surfaces).
- Apply the strip on the object to be fixed.
- Before removing the blue protective film, press strongly on all the strip in order to avoid creases or air bubbles.
- Remove the blue film and then place strongly the object on the strip. The tack is immediate.
- As Fix Pads provide an instant tack, it is necessary to ensure correct positioning before the item is stuck into its place.

Don't touch the adhesive with your fingers, avoid direct contact with water and/or sunlight; can affect considerably the bonding power.

Specific data	
Colour	Transparent amber
Weft	White polyester
Total thickness	0,8 mm
Strip width	2 cm
Strip length	4 cm
Tensile strength	2,8 kg/cm
Elongation at break	30%
Temperature resistance	From -25 to +50°C
Application temperature	From +15 to +30°C

### STORAGE AND SHELF LIFE

In unopened original packaging, between +15 and +25°C its shelf life is 24 months since manufacturing date.

Store in a dry, clean and well ventilated place.

### CAUTIONS

Keep out of the reach of children.

Consult Material Safety Data Sheet for full list of hazards and the directions on the product label itself.
