

FALO' PULISCIVETRO

Saratoga Falò Puliscivetro is an alkaline cleanser for removing soot deposits and smoke films from recess fireplaces and stoves closing glass.

APPLICATION FIELDS

Saratoga Falò Puliscivetro is ideal for fireplaces and stoves glass. For a daily cleaning it reaches shiny results easily: swift and efficient where normal domestic cleansers are not, without damaging any other part of the fireplace.

APPLICATION:

- Ensure that the surface to be cleaned is cold or lukewarm.
- Nebulize the product uniformly onto the glass, avoiding any dripping.
- Let it act for approximatively one minute, then remove the dirt with a damp cloth.
- Rinse well with water. Do not let the product dry on the glass.

SPECIFIC DATA

Appearance	Limpid liquid
Smell	Typical light
pH	11,4 at 100%
Freezing point	5°C
Boiling point	>100°C
Flammability point	Not flammable
