

Saratoga White Silicone Sealant in Blister pack with Anti-mould protection

Saratoga White Silicone Sealant in blister pack with Anti-mould protection is an acetic one-component silicone sealant, that cures quickly thanks to the atmospheric humidity, creating an extremely elastic and adhesive seal.

It is pure silicone, and does not contain solvents. Excellent resistance to moulds, fungi, steam, grease and cooking oils. High resistance to UV rays and atmospheric agents, keeps unchanged its exceptional physical features, even after several years of external exposure, with no influence from low and high temperatures.

It has excellent adhesion to glass, ceramic, steel, aluminium, some plastic materials, wood and varnished supports.

APPLICATION FIELDS

Saratoga White Silicone Sealant in blister pack with Ant-mould protection is especially suitable for sealing sanitary and kitchen systems, bathrooms, showers, washbasins, toilets and wash houses; can also be used between door and window frames and glasses, external and internal refrigerating rooms panels, U-Glass, solar panels, skylights and air-conditioning systems.

APPLICATION

All surfaces must be compact, clean, dry, dust free and degreased.

- It is recommended to use a masking tape on both sides of the joint for a better result (remove right after application).
- Cannot be painted, therefore paint before applying.
- Apply at the bottom of the gap some insulation material (such as adhesive tape); with deep gaps, fill with some fill-up material (such as Saratoga Joint•Filler or expanded plastic).
- Cut the nozzle at the desired diameter.
- Extrude the product with the little key given, within 5 minutes smooth with a spatula wetted with soapy water.
- Tack free 1 hour, cured in 24 hours.

Clean surfaces and tools within 10 minutes with a clean cloth wetted with solvent or Saratoga Via•Sil Fresco. When cured, clean with Saratoga Via•Sil Indurito.

Specific data

| | | |
|----------------------------|----------|-------------------------|
| Kind of sealant | | Acetic silicone sealant |
| Specific weight | | 0,98 |
| Colour | | White |
| Consistency | | Thixotropic |
| Extrusion rate | g/min. | 50-70 |
| Working time | minutes* | 10 |
| Cure time | mm/24h* | 2-3 |
| Application temperature | °C | +5/+40 |
| Tensile strength | MPa | 2,3 |
| Modulus at 100% elongation | MPa | 0,55 |
| Elongation at break | % | 450 |
| Shore A hardness | ° | 20 |
| Heat resistance | °C | -50/+160 |
| Working movement | % | 20 |

At 23°C and 50% Relative Humidity

STORAGE AND SHELF LIFE

Between 20 and 25°C its shelf life is 24 months since manufacturing date.

CAUTIONS

When curing, it exhales a small quantity of acetic acid. Therefore, ensure to ventilate your working environment.

Keep out of the reach of children.

Consult Material Safety Data Sheet for full list of hazards and the directions on the product label itself.
